

## SESSION 1

# DERMATOLOGICAL MANIFESTATIONS IN IBD

## Cutaneous Manifestations of Inflammatory Bowel Disease

*Melinda Gooderham, MD MSc FRCPC*

This presentation delves into the world of cutaneous manifestations in inflammatory bowel disease (IBD) while stressing the vital importance of collaborative care. We will explore the various dermatological manifestations linked to IBD, emphasizing their classification, clinical significance and diagnostic value, particularly in early disease detection. The discussion will extend to the array of treatment options available, both established and emerging, with a strong emphasis on the need for a multidisciplinary approach involving gastroenterologists and dermatologists.

This presentation aims to provide gastroenterologists with a practical understanding of cutaneous manifestations in IBD, equipping them to offer more informed and patient-centered care. Increased awareness of these manifestations can lead to improved patient outcomes and a higher quality of life.
